The Jordan Valve Sliding Gate Seat

- Unsurpassed trim life and accuracy
- Short stroke / Fast response
- Straight through flow
- Stainless Steel is our base seat/trim material
- Self-lapping/ self-cleaning
- Quiet operation
- Minimum maintenance
- Low long term cost of ownership

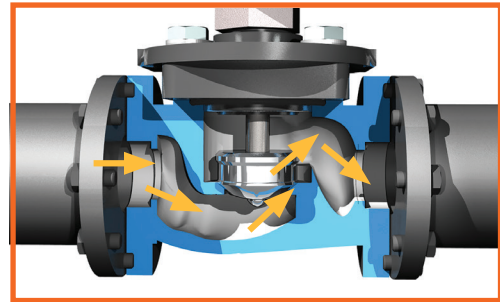

Sliding Gate

Straight through flow

VS.

Globe Style

Flow changes direction three times

Accuracy of Regulation

Three things determine droop in pressure regulators

- Stroke Length – the shorter, the better.
- Diaphragm Area – the larger, the more accurate.
- Spring Rate – the lighter the spring, the more sensitive the regulator.

The short stroke in the Jordan Valve Mark 60 minimizes droop/increases accuracy!
